Keywords: Frame, Link, Macromedia Dreamweaver MX

## **Abstract:**

Museum Web site application programs are created using Macromedia Dreamweaver MX program whose goal is to present the National Museum into an Internet network that can be opened by anyone who is interested and also want to learn or understand from about about this museum. From the home.htm page we can move to the next page with a link without having to go back to the home page.

Use Frame, Link and others in making this program a facility has been provided by Macromedia Dreamweaver MX to make it easier for it to make a web page.
